## DESIGN

## Craft Project

# Fabric Pinboard

### Before you begin...

I had a canvas, purchased from a cheap store, already put together. This tutorial is to turn it into a pinboard only, not to make the canvas.

### Supplies needed...

- ✂ Fabric - 20 to 40 cm more than your canvas size.
- ✂ A canvas - any size
- ✂ Wadding or batting - the size of your canvas
- ✂ Nail gun & nails (Manual or electric, doesnt matter)

### Conditions...

This tutorial is © Frianki 2014. This tutorial can be used for personal applications, but not commercial use. Mass production, file sharing or reselling of this pattern is not allowed without express written permission from Frianki. Please credit Frianki as the tutorial source, and link to the tutorial on the Frianki website ([www.frianki.com](http://www.frianki.com)), if resulting project is shared online.

## Step 1

- Get a canvas, or make one. I had a cheap canvas (pictured on left) which to use, strip it all back down to the canvas part.
- Take some wadding (I had some scrap left over from another project) and cut it to the same size as your canvas. I double layered mine, because it seemed thin - and I wanted it to be about 1cm thick.

## Step 2

- Now take the fabric you wish to use and cut out around the canvas size - you will want to leave around 10 to 20 cm extra around each edge.
- Place the wadding in between the canvas and the fabric. Take the edge of one side of the fabric and pull tightly, and use a nail gun along each edge to secure the fabric to the wood of the canvas.

## Step 3

- Go around the entire canvas this way. When you get to a corner, press the fabric entirely one side, so the overhang is straight from one side, and fold it back on itself at a right angle. Press a nail from the gun right in the corner, on the fold, and that should hold it well.

## Step 4

- Once you have gone around with the nail gun and secured all the fabric, cut off all the excess. And you're done!
